Fund concept

MI Multi Strategy SRI is a global mixed fund. Depending on the market assessment, active investments are made in various asset classes, whereby the share of equities may amount to a maximum of 30% of the fund assets. Subordinated bonds and government bonds of the euro countries Portugal, Italy, Ireland, Greece and Spain may not be acquired. The composition of the fund assets follows § 25 PKG and the BMSVG.

Within the respective asset classes, both individual securities and fund products are used. In addition to core investments, satellite investments serve to achieve an additional return and broader risk diversification. Derivatives are used for tactical adjustments of the asset allocation as well as for hedging purposes.

The fund is a sustainable fund within Article 8 of Regulation (EU) No. 2019/2088. Social, ethical and environmental characteristics are promoted in the fund. Exclusion and quality criteria (negative and positive criteria) are considered in the selection process. However, no sustainable investments within the scope of the EU taxonomy are targeted or sustainable investment objectives are pursued. Details on the carbon footprint and the ESG concept as well as the prospectus can be found on our website www.kathrein.at.

The fund has been awarded the Austrian Eco-label.

**The Sharpe ratio compares the additional return and risk of an investment with a safe (risk-free) money market investment, taking into account the volatility of the respective portfolio.*

Past performance is not a reliable indicator of future performance and returns of the fund. The performance is calculated in accordance with the OeKB method and already takes into account management fees, any performance-related fee and other costs charged within the fund. Individual costs such as the subscription fee, redemption fee or taxes such as withholding tax are not included in the performance calculation. The specific, individual amounts of these are not known and, if taken into account, would have a correspondingly negative impact on performance. If an purchase fee of 3% is charged, this reduces the performance in the year of purchase by EUR 300 for every EUR 10,000 invested. Note for investors with a home currency other than the fund currency: We would like to point out that the return may rise or fall as a result of currency fluctuations.

Fund notice

Derivative financial instruments may be used as part of the investment strategy and for hedging purposes. In accordance with the investment strategy, the management company may enter into transactions with derivatives on behalf of the investment fund. Such transactions could temporarily increase the risk of loss of assets in the investment fund.

The investment fund may invest in investments pursuant to Section 166(1)(3) of the Investment Funds Act 2011 (InvFG) (Alternative Investments), which entail an increased investment risk compared to traditional investments.
