Fund concept

HYPO-RENT is a bond fund with a focus on Austrian securities. It is one of the most traditional Austrian ward funds - its launch dates back more than 35 years (inception in 1985).

The qualifying securities are, for example, Austrian government bonds, bonds guaranteed by the state or the federal states, mortgage bonds and public-sector mortgage bonds. Interest rate risk is actively managed. The fund invests predominantly in Austrian federal bonds and collateralised bank bonds of Austrian issuers (pursuant to § 217 of the Austrian Civil Code) and is therefore suitable for severance pay and pension provisions pursuant to § 14 of the Austrian Income Tax Act.

The fund is a sustainable fund within Article 8 of Regulation (EU) No. 2019/2088. Social, ethical and environmental characteristics are promoted in the fund. Exclusion and quality criteria (negative and positive criteria) are considered in the selection process. However, no sustainable investments within the scope of the EU taxonomy are targeted or sustainable investment objectives are pursued. Details on the ESG concept as well as the prospectus can be found on our website www.kathrein.at.

The fund has been awarded the Austrian Eco-label and the FNG seal. The guidelines for ethical investments of the Austrian Bishops' Conference and the Austrian religious orders are also adhered to.

*The Sharpe ratio compares the additional return and risk of an investment with a safe (risk-free) money market investment, taking into account the volatility of the respective portfolio.

Past performance is not a reliable indicator of future performance and returns of the fund. The performance is calculated in accordance with the OeKB method and already takes into account management fees, any performance-related fee and other costs charged within the fund. Individual costs such as the subscription fee, redemption fee or taxes such as withholding tax are not included in the performance calculation. The specific, individual amounts of these are not known and, if taken into account, would have a correspondingly negative impact on performance. If a purchase fee of 3% is charged, this reduces the performance in the year of purchase by EUR 300 for every EUR 10,000 invested. Note for investors with a home currency other than the fund currency: We would like to point out that the return may rise or fall as a result of currency fluctuations.
