The actual amount will vary depending on how often the fund manager buys and sells.

Fund concept

Kathrein Mandatum is an internationally oriented low-risk asset management fund managed by Kathrein's inhouse portfolio management team. With a bond weighting of up to 100%, the fund is geared to the individual needs of a conservative investor, who wants to achieve preservation of his investment funds, while at the same time earn more than government bonds. The fund assets are invested in bond funds of Kathrein Privatbank, whose management style is based on quantitative models. In addition, the fund invests in products of Kathrein Capital Management GmbH and in exchange-traded funds ("ETFs", exchange-traded funds).

**The Sharpe ratio compares the additional return and risk of an investment with a safe (risk-free) money market investment, taking into account the volatility of the respective portfolio.*

Past performance is not a reliable indicator of future performance and returns of the fund. The performance is calculated in accordance with the OeKB method and already takes into account management fees, any performance-related fee and other costs charged within the fund. Individual costs such as the subscription fee, redemption fee or taxes such as withholding tax are not included in the performance calculation. The specific, individual amounts of these are not known and, if taken into account, would have a correspondingly negative impact on performance. If an purchase fee of 3% is charged, this reduces the performance in the year of purchase by EUR 300 for every EUR 10,000 invested. Note for investors with a home currency other than the fund currency: We would like to point out that the return may rise or fall as a result of currency fluctuations.

Fund notice

The fund currency of the fund is EUR. The fund regulations of Kathrein Mandatum have been approved by the Financial Market Authority. The Kathrein Mandatum may invest more than 35% of the fund assets in securities or money market instruments issued or guaranteed by Austria, Germany, Belgium, Finland, France or the Netherlands via individual security investments and/or via investments in other investment funds, whereby the investment in one and the same issue may not exceed 30% of the fund assets. The management company may enter into transactions with derivatives for the Kathrein Mandatum as part of the investment strategy. This may at least temporarily increase the risk of loss in relation to assets held in the fund. Derivative instruments that are not used for hedging purposes may be acquired. In this context, investments may also be made predominantly (in relation to the associated risk) in derivatives, whereby the risk amount for market risk (relative VaR) set for all fund investments at twice the total risk of the reference portfolio must be complied with. Due to the current low or negative capital market returns, interest income in the fund is currently insufficient to cover current costs and is highly unlikely to do so in the near future. Reliable longer-term forecasts are not possible in view of the imponderability of future market developments. The management company invests for Kathrein Mandatum mainly in other investment funds.
